

FIA *ACTION* FOR *ENVIRONMENT*

ROAD TO ACTION

The FIA is taking action to develop and improve environmental sustainability across motoring and motor sport.

The FIA Action for Environment strategy seeks out and promotes environmental solutions for all our sporting and mobility clubs, as well as event organisers, teams and championships.

We are working with our members and other stakeholders to ensure that they measure and improve their environmental impact, and move ahead with technological innovations.

TWO PILLARS STRATEGY

MEASURE + IMPROVE

By following the three actions below, you are part of our collective responsibility to act and behave in a way that minimises your Environmental Footprint.

- **Implement Environmental Impact studies**
- **Share best practice and raise awareness**
- **Report your outcomes and performance**

The FIA has developed tools and specially-designed accreditation guidelines that can assist you through such implementation.

INNOVATE + PROMOTE

The FIA has implemented Environmental Sustainability as a key component of FIA governance and commits to the following:

- **Pioneering innovation and new technology**
- **Developing policies for technology transfer to consumer market**
- **Supporting promotional activities under the Action for Environment campaign**

The FIA is working closely with its members, sports and mobility stakeholders at local, regional and national platforms.
