## 2026 FIA EUROPEAN DRAG RACING CHAMPIONSHIP

## Clarification Note No.10 – to all FIA European Drag Racing Championship Competitors

Dear Competitors,

Please find below a clarification note regarding the 2026 FIA European Drag Racing Championship Sporting Regulations.

**2026 FIA European Drag Racing Championship – Sporting Regulations**

**Clarification of Article 10 – Top Methanol handicap index system**

The FIA Drag Racing Committee is pleased to announce that the handicap index for the 2026 FIA European Drag Racing Championship has been adjusted according to the regulations, concerning the Top Methanol Funny Car and Top Methanol Dragster combined category. Starting with Round 2 of the 2026 Championship,

**The Index will be 0,23 sec.**

This means that during Eliminations, the Top Methanol Funny Cars in the Class will get a 0,23 sec. head start on the Start line (Pro Tree).

During qualifications, to determine the qualifying positions, the index of 0,23 sec. will be deducted from the Top Methanol Funny Car ET's and will be compared with the Top Methanol Dragster ET's.

In the event of a new European ET record being set in any of the two Top Methanol classes, the index will be adjusted accordingly for the next possible Championship round.

The index of 0,23 sec. has been determined by calculating the difference between the European ET-records of the Top Methanol Funny Car(5,42 sec.) and Top Methanol Dragster(5,19 sec.) Class.

Yours sincerely,

Lars Pettersson  
President of the  
FIA Drag Racing Commission

Yasin Özer  
FIA Race Director

Frans Steilberg  
FIA Technical Delegate

**REMINDER:** Any FIA opinions given above are advisory in nature and do not constitute Sporting or Technical Regulations. It is for the Stewards, and ultimately the FIA International Court of Appeal, to offer binding interpretations of the Sporting and Technical Regulations
